New York State Pyramid Model Partnership
Supporting Social Emotional Competence in New York State’s Young Children

Vision

All New York State infants, toddlers, young children and their families will be supported in their social-emotional development to promote their success in school and life.

Overview

Social and emotional well-being sets the foundation for the development and learning of infants, toddlers and young children. The Early Childhood Advisory Council - comprised of experts in child care, education, health care, family support and mental health - has identified the critical need to better support and teach young children and families social and emotional skills. In response, the New York State Council on Children and Families took the lead in bringing together a team of public and private agencies to form a new partnership to provide more early childhood professional development opportunities. This new partnership, the New York State Pyramid Model Partnership, will promote the statewide use of the Pyramid Model, an evidence-based framework proven to be an effective approach to building social and emotional competence in early care and education programs.

Initial funding for the implementation of the Pyramid Model is being provided by the New York State Council on Children and Families, the Head Start Collaboration Project and New York State Project LAUNCH (Linking Actions for Unmet Needs in Children’s Health). Staff support is being provided by all members of the Partnership.

Goals

The New York State Pyramid Model Partnership will work collaboratively to:

▲ Increase the number of early childhood trainers and coaches providing professional development to the early childhood workforce to meet the social and emotional development needs of young children;

▲ Support partnerships between practitioners and parents;

▲ Support the implementation and sustainability of the Pyramid Model in early childhood settings; and

▲ Evaluate the effectiveness of implementing the Pyramid Model in New York State.

With its emphasis on strong relationships, support for social competence and preventing and addressing challenging behaviors in infants, toddlers and young children, the Pyramid Model is congruent with other New York State early childhood efforts to set the foundation for development and lifelong learning. These existing efforts include:

- Promoting positive school climates through the implementation of Positive Behavioral Interventions and Supports (PBIS). New York State Education Department. [http://nyspbis.org/](http://nyspbis.org/).

- Supporting the provision of evidence-based services for children experiencing social-emotional development and mental health issues through the redesign of New York’s Medicaid Program.
